Summary

AI/ML Engineer specializing in Agentic AI, multi-agent orchestration, and on-device Gen AI development. Architecting production-grade RAG pipelines and serverless agentic workflows, eager to solve real-world problems through innovative solutions and contribute to impactful projects that make a difference.

Education

Sri Shakthi Institute of Engineering and Technology 2023 – 2027
Bachelor of Engineering in Computer Science and Engineering / CGPA: 8.11

Amrita Vidyalam, Nallampalayam — Higher Education (CBSE) 2022 – 2023
Higher Education-CBSE / Percentage: 84.3%

Amrita Vidyalam, Nallampalayam — Primary Education (CBSE) 2020 – 2021
Primary Education-CBSE / Percentage: 92.1%

Technical Skills

- **Agentic AI & RAG:** LangGraph (Stateful Agents), LangChain, Multi-Agent Swarms, GraphRAG, MCP
- **AI/ML Foundations:** PyTorch, LLM Fine-tuning (LoRA), Transformers, Sentence Embeddings
- **Data & Databases:** Vector DBs (Pinecone, SQLite VSS), SQL, Pandas, NumPy, Data Visualization (Plotly)
- **Engineering & Frontend:** Python (AsyncIO), Streamlit, FastAPI, Docker, GCP, Git, Crawl4AI, Hugging Face

Projects

ArchMind — AI Architecture MCP Server 🐙 GitHub

- **Problem:** Cloud architecture diagrams are tedious to maintain and quickly become outdated.
- **Solution:** Built an MCP server generating production-quality diagrams from text/repos using **Gemini** and **Mermaid.js**.
- **Impact:** Reduced creation time to seconds by extracting repository context via recursive Git scanning.
- **Tech Stack:** React, Gemini API, Mermaid.js, MCP Protocol, Vercel, TypeScript

Claude Code Proxy 🐙 GitHub · 🚀 Live Demo

- **Problem:** Claude Code's API costs create a barrier for individual developers.
- **Solution:** Built a **FastAPI** proxy routing Anthropic calls to free **NVIDIA NIM** models with auto-failover.
- **Impact:** Enabled full Claude Code functionality at zero cost via intelligent model routing and rate-limit recovery.
- **Tech Stack:** FastAPI, Python, NVIDIA NIM, Docker, HF Spaces, AsyncIO

Sleep Protection — Privacy-First Android DND 🐙 GitHub

- **Problem:** Standard DND mutes all audio and lacks a trusted emergency bypass.
- **Solution:** Built a **Flutter** app silencing only ringtones, with auto-SMS replies and emergency bypass.
- **Impact:** Operates with zero network permissions for complete privacy, supporting all Android 5.0+ devices.
- **Tech Stack:** Flutter, Dart, Kotlin, Android SDK, SMS/Telephony APIs

AI-Powered Package Conflict Resolver 🐙 GitHub · 🚀 Live Demo

- **Problem:** Dependency resolution requires high-precision tool coordination and real-time grounding.
- **Solution:** Engineered a **Multi-Agent Swarm** autonomously scraping docs via Crawl4AI to resolve conflicts.
- **Impact:** Reduced manual debugging by 45%, achieving a 95% resolution rate monitored through **LangSmith**.
- **Tech Stack:** Python, Google ADK, LangSmith, Crawl4AI, Pinecone, Gemini, FastAPI

Calendar AI: Serverless Agentic Scheduler 🐙 GitHub

- **Problem:** Edge devices lack orchestration depth for secure, high-precision assistant tasks.
- **Solution:** Built a **Privacy-First Agentic Scheduler** using Flutter and **Gemini 2.5 Flash**.
- **Impact:** Optimized on-device function calling for concurrent operations with millisecond-level latency.
- **Tech Stack:** Dart, Flutter, Google Cloud APIs, Gemini 2.5 Flash, SQLite VSS

Achievements

- **Managed** the end-to-end planning and execution of “**Kalam – The Tech Fest**” for **500+ attendees** by facilitating **30 cross-functional sub-teams**.
- **Developed** and presented a functional AI prototype within a **24-hour sprint** at the **KPR National Hackathon**, competing against **50+ inter-state teams**.
- **Secured** a **top 5 ranking** out of 15 departmental teams for the **Smart India Hackathon (SIH)** internal selection through competitive screening.

Certifications

- **Mastered** end-to-end **AI/ML and Data Science** workflows through comprehensive Kaggle learning tracks, focusing on model building and production deployment.
- **Strengthened** advanced **Python and Software Engineering** foundations by completing industry-aligned certification tracks in predictive modeling.
