SUMMARY

AI/ML Engineer specializing in Agentic AI, MCP servers, multi-agent orchestration, and privacy-first mobile apps. Architecting production-grade RAG pipelines, serverless agentic workflows, and deployed MCP servers. Finalist at CalHacks 12.0 (UC Berkeley), SIH, and KPR National Hackathon.

TECHNICAL SKILLS

Agentic AI & MCP: LangGraph, LangChain, Multi-Agent Swarms, MCP Servers, Google ADK, DSPy, GraphRAG

AI/ML: PyTorch, LoRA Fine-Tuning, HuggingFace Transformers, YOLO, Sentence Embeddings

Backend & APIs: Python (AsyncIO), FastAPI, SSE Streaming, REST APIs, Flask

Data & Storage: Pinecone, SQLite VSS, MongoDB, PostgreSQL, Pandas, NumPy

Infrastructure: Docker, GCP, Vercel, HF Spaces, GitHub Actions

Mobile: Flutter (Dart), Kotlin, Android SDK, SMS/Telephony APIs

PROJECTS

ArchMind - AI-Powered Architecture MCP Server

Challenge: Cloud architecture diagrams take hours to create manually and become outdated as code evolves. Existing tools require dragging boxes and lines.

Solution: Built an MCP server with recursive Git tree scanning that extracts full repo context and generates Mermaid.js diagrams organized into Frontend/API/Logic/Data/External tiers.

Impact: Reduces diagram creation from hours to seconds. Accessible to any AI agent via MCP protocol.

Stack: React, Gemini API, Mermaid.js, MCP Protocol, Vercel, TypeScript

Claude Code Proxy - Free NVIDIA NIM API Proxy

Challenge: Claude Code requires \$100+/month API access - prohibitive for independent developers.

Solution: FastAPI proxy intercepting Anthropic API calls and routing to 8 free NVIDIA NIM models with auto-failover.

Impact: Full Claude Code functionality at zero API cost. Graceful rate-limit handling.

Stack: FastAPI, Python, NVIDIA NIM, Docker, HuggingFace Spaces, AsyncIO

Sleep Protection - Privacy-First Android DND

Challenge: Android DND mutes all audio, doesn't inform callers, and has no trusted emergency bypass.

Solution: Flutter + Kotlin app using INTERRUPTION_FILTER_PRIORITY for ringtone-only silence. SMS auto-reply with EMERGENCY override (1h window, 2-min ringer).

Impact: Zero network permissions. Works on all Android 5.0+. No tracking or cloud dependency.

Stack: Flutter, Dart, Kotlin, Android SDK, SMS/Telephony APIs

Package Conflict Resolver - Multi-Agent ADK System

Challenge: Python dependency conflicts require cross-referencing PyPI, GitHub issues - tedious and error-prone.

Solution: Three-agent swarm (Triage, Researcher, CodeSurgeon) using Crawl4AI + ADK. PyPI API validation prevents hallucinated versions.

Impact: 45% reduction in debugging time, 95% resolution rate, traced via LangSmith.

Stack: Python, Google ADK, LangSmith, Crawl4AI, Pinecone, Gemini, FastAPI

AI-Powered Career Development Assistant

Challenge: Students lack data-driven guidance for company-specific role matching and skill gap analysis.

Solution: LangChain + Gemini RAG pipeline analyzing resumes against company role dataset via Pinecone.

Impact: Generates personalized learning paths and career to-do lists in Streamlit.

Stack: Python, LangChain, Google Gemini, Pinecone, Sentence Transformers, Streamlit

EDUCATION

Sri Shakthi Institute of Engineering and Technology

B.E. CSE (AI/ML) | 2023-2027 | CGPA: 8.11

Amrita Vidyalayam, Nallampalayam

Higher Secondary (CBSE) | 2022-2023 | 84.3%

Amrita Vidyalayam, Nallampalayam

Primary Education (CBSE) | 2020-2021 | 92.1%

ACHIEVEMENTS & HACKATHONS

- CalHacks 12.0 Finalist (UC Berkeley) - top collegiate hackathon globally
- KPR National Hackathon - 24-hour sprint, 50+ inter-state teams
- SIH Finalist - top 5 out of 15 teams in internal selection
- Google Tunix Hackathon - GRPO RL pipeline on Cloud TPUs
- Tech Fest Lead - managed 'Kalam' for 500+ attendees, 30 teams
- Vercel AI Gateway Hackathon - gamified model evaluation platform

CERTIFICATIONS

- Building Agentic RAG with LlamaIndex - DeepLearning.AI (2026)
- LangGraph Fundamentals - LangChain (2026)
- Multi AI Agent Systems - DeepLearning.AI (2026)
- Computer Vision using Azure - Coursera (2025)
- HashGraph Developer Course - Hedera (2024)
- Intro to Machine Learning (2024)
- Intro to Deep Learning - Coursera (2024)
