SUMMARY

AI/ML Engineer specializing in Agentic AI, MCP servers, multi-agent orchestration, and privacy-first mobile apps. Architecting production-grade RAG pipelines, serverless agentic workflows, and deployed MCP servers. Finalist at CalHacks 12.0 (UC Berkeley), SIH, and KPR National Hackathon.

TECHNICAL SKILLS

Agentic AI & MCP: LangGraph, LangChain, Multi-Agent Swarms, MCP Servers, Google ADK, DSPy, GraphRAG
AI/ML: PyTorch, LoRA Fine-Tuning, HuggingFace Transformers, YOLO, Sentence Embeddings
Backend & APIs: Python (AsyncIO), FastAPI, SSE Streaming, REST APIs, Flask
Data & Storage: Pinecone, SQLite VSS, MongoDB, PostgreSQL, Pandas, NumPy
Infrastructure: Docker, GCP, Vercel, HF Spaces, GitHub Actions
Mobile: Flutter (Dart), Kotlin, Android SDK, SMS/Telephony APIs

PROJECTS

ArchMind - AI Architecture MCP Server

MCP server that generates cloud architecture diagrams from text prompts or GitHub repos.
Uses Gemini 3 Flash + Mermaid.js with recursive Git tree scanning for full context.
Tiered subgraph output: Frontend > API > Logic > Data > External. Reduces diagram creation from hours to seconds.
Stack: React, Gemini API, Mermaid.js, MCP Protocol, TypeScript, Vercel

Claude Code Proxy - Free NVIDIA NIM Proxy

FastAPI proxy routing Claude Code API calls to 8 free NVIDIA NIM models.
Auto-failover on rate limits, real-time SSE streaming, Whisper transcription integration.
Deployed on HuggingFace Spaces with zero infrastructure cost.
Stack: FastAPI, Python, NVIDIA NIM, Docker, HF Spaces, AsyncIO, SSE

Sleep Protection - Privacy-First Android DND App

Offline-only Android app that silences calls/SMS during sleep with EMERGENCY bypass.
Isolates STREAM_RING audio only. Auto-replies to whitelisted contacts; reply 'EMERGENCY' within 1h = 2-min ringer restoration.
Zero network permissions. No servers, no cloud, no tracking. Android 5.0+.
Stack: Flutter, Dart, Kotlin, Android SDK, SMS/Telephony APIs

Package Conflict Resolver - Multi-Agent ADK

Stateful multi-agent swarm using Google ADK and Crawl4AI for dependency hell resolution.
45% reduction in debugging time, 95% resolution rate via agentic reasoning loop.
Stack: Python, Google ADK, LangSmith, Crawl4AI, Pinecone, Gemini, FastAPI

EDUCATION

Sri Shakthi Institute of Engineering and Technology - B.E. CSE (AI/ML) (2023-2027) - CGPA: 8.11
Amrita Vidyalayam, Nallampalayam - Higher Secondary (CBSE) (2022-2023) - 84.3%
Amrita Vidyalayam, Nallampalayam - Primary Education (CBSE) (2020-2021) - 92.1%

ACHIEVEMENTS

- CalHacks 12.0 Finalist (UC Berkeley) - top collegiate hackathon globally
- KPR National Hackathon - 24-hour sprint, 50+ inter-state teams
- SIH Finalist - top 5 out of 15 teams in internal selection
