Summary

Education

Institution	Duration	Details
Sri Shakthi Institute of Engineering and Technology	2023 – 2027	B.E. Computer Science and Engineering – CGPA: 8.11
Amrita Vidyalam, Nallampalayam – Higher Education (CBSE)	2022 – 2023	Higher Education – Percentage: 84.3%
Amrita Vidyalam, Nallampalayam – Primary Education (CBSE)	2020 – 2021	Primary Education – Percentage: 92.1%

Technical Skills

- **Agentic AI & MCP:** LangGraph (Stateful Agents), LangChain, Multi-Agent Swarms, MCP Servers, GraphRAG, DSPy
- **AI/ML Foundations:** PyTorch, LLM Fine-tuning (LoRA), HuggingFace Transformers, Sentence Embeddings
- **Backend & APIs:** Python (AsyncIO), FastAPI, SSE Streaming, REST API Design, Flask
- **Data & Vector Stores:** Pinecone, SQLite VSS, MongoDB, PostgreSQL, Pandas, NumPy
- **Infrastructure:** Docker, Google Cloud Platform (GCP), Vercel, HF Spaces, GitHub Actions (CI/CD)
- **Mobile:** Flutter (Dart), Kotlin, Android SDK, SMS/Telephony APIs

Projects

ArchMind — AI-Powered Architecture MCP Server

- **Problem:** Cloud architecture diagrams are tedious to maintain manually and quickly become outdated as codebases evolve.
- **Solution:** Built an MCP server that generates production-quality architecture diagrams from text prompts or GitHub repo URLs using Gemini and Mermaid.js.
- **Impact:** Recursive Git tree scanning extracts full repository context and organizes outputs into tiered subgraphs (Frontend -> API -> Logic -> Data -> External), reducing diagram creation from hours to seconds.
- **Tech Stack:** React, Gemini API, Mermaid.js, MCP Protocol, Vercel, TypeScript
- **Links:** [GitHub](#)

Claude Code Proxy — Free NVIDIA NIM Proxy

- **Problem:** Claude Code costs \$100+/month for API access, creating a barrier for individual developers.
- **Solution:** Built a FastAPI proxy that routes Claude Code's Anthropic API calls to 8 free NVIDIA NIM models with auto-failover, SSE streaming, and Whisper transcription.
- **Impact:** Enables full Claude Code functionality at zero API cost through intelligent model routing and automatic rate-limit recovery.
- **Tech Stack:** FastAPI, Python, NVIDIA NIM, Docker, HF Spaces, AsyncIO
- **Links:** [GitHub](#) · [Live Demo](#)

Sleep Protection — Privacy-First Android DND App

- **Problem:** Standard Android DND mutes all audio including music, doesn't inform callers, and has no trusted emergency bypass.
- **Solution:** Built a Flutter + native Kotlin app that silences only ringtone while preserving music streams, auto-replies to SMS with EMERGENCY bypass for whitelisted contacts.
- **Impact:** Zero network permissions — no servers, no cloud, no tracking. Works on all Android devices 5.0+.
- **Tech Stack:** Flutter, Dart, Kotlin, Android SDK, SMS/Telephony APIs
- **Links:** GitHub

AI-Powered Package Conflict Resolver

- **Problem:** Dependency resolution requires high-precision tool coordination and real-time documentation grounding.
- **Solution:** Engineered a Stateful Multi-Agent Swarm (Google ADK) using Function Calling to autonomously scrape package docs via Crawl4AI and execute conflict-resolution scripts.
- **Impact:** Reduced manual debugging by 45%, achieving a 95% resolution rate monitored through LangSmith.
- **Tech Stack:** Python, Google ADK, LangSmith, Crawl4AI, Pinecone, Gemini, FastAPI
- **Links:** GitHub · Live Demo

Calendar AI: Serverless Agentic Scheduler

- **Problem:** Edge devices lack the orchestration depth required for secure, high-precision personal assistant tasks.
- **Solution:** Built a Privacy-First Agentic Scheduler using Flutter and Gemini 2.5 Flash, implementing a hybrid intent router for zero-egress tool execution.
- **Tech Stack:** Dart, Flutter, Google Cloud APIs, Gemini 2.5 Flash, SQLite VSS
- **Links:** GitHub

Achievements

- **Tech Fest Lead:** Managed end-to-end planning of “Kalam – The Tech Fest” for 500+ attendees by facilitating 30 cross-functional sub-teams.
- **KPR National Hackathon:** Developed a functional AI prototype within a 24-hour sprint, competing against 50+ inter-state teams.
- **SIH Finalist:** Ranked top 5 out of 15 departmental teams for Smart India Hackathon internal selection.

Certifications

- Building Agentic RAG with LlamaIndex - DeepLearning.AI (2026)
- LangGraph Fundamentals - LangChain (2026)
- Multi AI Agent Systems - DeepLearning.AI (2026)
- Computer Vision using Azure - Coursera (2025)
- HashGraph Developer Course - Hedera (2024)
- Intro to Machine Learning (2024)
- Intro to Deep Learning - Coursera (2024)
